That's absurd. Can't be explained rationally. or at least not as rational
behaviour.

This looks like a classic example of two people bidding against each other - who don't know the market value of this equipment. I checked eBay, and noted that two HQ-129-X receivers have sold recently for around $450. That sounds about right for a good clean example. It's a good radio - but not worth over $1,000.

73,
Art Lebermann

> Do these suggestions resonate with anyone? Do you have any more good
suggestions for the AWA?

The question is, how do youngsters (those under 50) relate to "antique" ?
Those who enjoy old radio and haven't yet passed beyond the ether are
getting fewer. As in nature, when a population drops below the critical
point it rapidly becomes extinct. Time to say, bye-bye....?

"Radio," by today's technical culture standards, is seen as crude and
unrewarding. Radio is far from being on the frontiers of discovery and
invention anymore. It no longer has the lure we OT's regurgitate in our

dreams. Radio is "old."

When interests and activities are popular many bitch about the rules but most manage to live with them and participate. When popularity fades the cranks carry on and help to scare away the last to show up. If AWA hams want their OTA activities to remain successful they have to update their image, create a new and attractive style of participation that agrees with more modern thinking. Your suggested rules changes help to update thinking, but is it enough, Jim?

My observation is "contesting" is getting to be a tiresome way of doing things for many. Collectivity and cooperation are being renewed as ways to interact with our common interest friends and new acquaintances. Perhaps a sort of on the air "hootenanny," would revive participation. Does that sound crazy, way off, rediculous? I wonder...

And the aliens took the original knobs and substituted generic
chicken head knobs. (Not that HQ-129 pointer knobs were all good.
The HQ-129 is my choice for receiver with the knobs most likely to
have been replaced or need to have been replaced.)

The back-up bidder can have mine with proper knobs. ;-)

First, that box of TTY relays, both the big old WeCo cans and a few sealed mercury-wetted ones. With some sort of smallish motorized rotary switch for good measure. I couldn't reach the person who originally wanted them, once I got the stuff dug out and boxed.

Next, a half-dozen Beckman counter modules. These are the decade column on neons on the front, 4 dual triodes sticking out the back plugins used in a number of their freq meters, totalizers, etc. I'm guessing nobody would want the chassis they're in (NOT the "universal eput and timer" freq meter), which is heavy as sin, even with the missing power xfmr.

Either or both for whatever the shipping costs.

You must admit, it IS a neat looking thing built by a skilled craftsman!

Take a second and read the description of these amplifiers-down to the solder! Must be magic solder.
I must admit the woodwork looks great, though, and I'd like to see what the builder did under the chassis

I remember building a single amplifier for a friend in the 1950s-using a

cake pan for a chassis, some WWII knobs and PP6V6s. I visited him some 30 years later and he had my amplifier all shined up, placed on the mantle-and he was as proud of it as I was-he had used it for 20 years. I think I spent no more than $20 on it, including Thordarson output and power transformers and chokes-and of course, the cake pan-and 'stuff' from the junkbox.

Herb W5AN

PS It bothered me at the time that the sides of the cake pan were sloped and not perpendicular to the bottom (used as the top) of the pan, but the shape sort of grew on me.

 - Greetings -

Time was when one could have bought the music group for the price of
these amplifiers.

Appears that it is a tube compliment to the 211 that it was chosen.

Within the amp the tube complement includes the 211.

[So much for English as the language of choice.]

My first big audio amp had p-p 211's driven by p-p 6N7. That's where
I learned to keep one hand in my pocket when checking the voltages.

73 Rhett - KE4HIH

I wish someone would put this level of craftsmanship-
from a decorative and artistic standpoint-
into homebrewed ham radio transmitters or amps.
Some do homebrew rigs that are technically elegant
and skillfully built, but lack esthetic beauty for its own sake.
I have this vision of a 211 transmitter built with
glass or plexi panels in a retro-1930s Deco style,
but have not the skill to create such a thing.
The sight of big, glowing tubes should lend itself well
to artistic expression.  We can say what we want about
"audiophool-isness," and it may even be true,
but my; those amps are pretty.
D.S.

Airplanes?
 Does that mean Pipers, Mooney Mites or Queen Air kind? or models, Sandy

Many years ago I picked up a couple
military (aircraft) receiver and
transmitter. I recall them being small - on
the order of 6x6x6 in size. There was a
local collector that I eventually sold them
to, but I've never seen a set like it
since. Anyone got any idea what these were,
I think the xmtr had a eye tube in it but
just don't recall exactly.
Bob

Sounds like the xmitter might have been an RCA AVT-112A.
I had one mobile on 80m back in the late 50s.
6V6 modulted by a 6V6, as I recall.

I'd love to find one - I've already got the PMR-6A rx like I had back then.

```

My guess would be the RCA AVT-112 transmitter with four 6V6 tubes in it! Think the matching receiver was an AVR-20 or AVR-120. There were two receivers, one covered about 2-6.5 Mhz and one covered around 200-400 Khz. Perhaps these were the ones you were thinking about.

73,

Sandy W5TVW

Here's the link to the little rigs I'd
inquired about.
Quick reply by the group. As I recall, kind
of rare - seems to me a broadcaster from
WCCO in the Twin Cities collected these and
he was pretty pleased to get them and this
would have been back in 1971-73 I think. I
think I scarfed them up at a hamfest and he
was about10 minutes too late to buy them!
He tracked me down and wanted them for his
collection. They looked almost new as I
recall.
Thanks...
Bob
